SKILLS

- HTML, CSS, JavaScript (ES6)
- React, Redux, jQuery, Ajax
- Express.js
- Node.js
- MongoDB, MySQL

PROJECTS

- **Webe-Sushi** - https://github.com/wbenarto/Webe_Sushi
 - E-commerce mock website for Pick Up and Drop Off sushi orders
 - Users are able to sign in or sign up, upload products using user input, upload multiple product images in carousel, display product detail, filter search, add and remove from cart.
 - React, Redux, Node, MongoDB, Heroku
- **Covid 19 Tracker** - https://wbenarto.github.io/COVID19_Tracker/
 - Using data provided by covid.mathdro.id/api to track daily infection rate globally and also for countries displayed in Bar chart and Line chart to visualize the data
 - React, Node.js
- **LIRI node App** - <https://github.com/wbenarto/LIRI-node-app>
 - Liri App allows users to pull up information about a song, a movie, or a concert using Spotify, BandsInTown APIs and OMDb APIs via the appropriate NPM modules. LIRI uses API calls and returned JSON objects, outputting the information in a specified format.

1/8/2021

Dear Hiring Manager at Tesla:

I am writing this letter to apply for the Software-Mobile engineering internship in Summer 2021. I am a self-taught full-stack web developer with a coding bootcamp experience at UC Berkeley Ext. I am passionate about accelerating the world's transition to sustainable energy, I am most excited about what Tesla bring to this world and I would like to have a chance to be a part of that team.

My journey up until this point is unique to say the least. I was working as Regional Operations Manager in the food industry until I made the decision to take the leap of faith and jump into software engineering. I want my knowledge and experience to be useful in helping with Tesla's mission, as I believe Tesla will expand to many countries, including my birth country of Indonesia. It would be a dream come true to be a part of a company that wants to better our way of life.

There are still a lot of work for Tesla to do in order to achieve the mission and I would like to be able to contribute as a part of Tesla's Software Engineering team in the future, working with the most complex problems we face. Please reach out to me for any questions and I thank you for the careful consideration.

Sincerely,

William Benarto
